agile oracle application express shows how skilled motivated and self organizing developers can

realize extraordinary commercial benefits from oracle application express the secret is to couple application express with an agile software development approach this book leads the way oracle application express is well suited to agile processes with its support for rapid prototyping and team development application express supports a gamut of enabling technologies such as sql html css javascript and more that enable you to deliver any type of web application to meet your development needs agile oracle application express helps you take the feature set of application express and marry it with the processes of agile development to iteratively design create and deliver quality applications on time and within budget

the autonomic nervous system ans plays a central role in the pathogenesis of several cardiovascular diseases such as hypertension pulmonary hypertension myocardial infarction atrial fibrillation ventricular tachyarrhythmias fibrillation vt vf and heart failure cardiovascular diseases cvds are the leading cause of death globally taking an estimated 17.9 million lives each year 31 of all deaths worldwide mechanisms implicated in the pathophysiology of cvd include autonomic nervous system ans dysfunction endothelial dysfunction vasoconstriction and systemic inflammation today several therapeutic options are available to treat heart and cardiovascular patients mainly medical therapies targeting specific pathways in vascular biology and physiology centered around vasoconstriction cell proliferation sympathetic overactivity defective renin angiotensin aldosterone system and ans imbalance those drugs have improved the quality of life and survival of patients on the other hand they do not cure the disease and are associated with side effects like dry cough flushing peripheral edema hyperkalemia hypotension and reduction of cardiac output despite significant advances cvds remain a serious life threatening condition and new therapeutic modalities must be pursued neuromodulation therapies which is one of the upsurging fields of modern medicine involving a wide range of specialties and a variety of disorders it is the process of stimulation inhibition regulation or therapeutic alterations of the electrical or and chemical activities in the central peripheral or autonomic nervous systems that can be directed toward reverse prevent progression of cardiovascular disease by using implantable or non implantable medical devices such as pacemakers neural stimulators or micro infusion pumps

this volume is an outgrowth of the 2nd international workshop on svd and signal processing which was held in kingston rhode island 25-27 june 1990 the singular value decomposition svd has been applied to signal processing problems since the late 1970 s although it has been known in various

forms for over 100 years svd filtering has been shown to give better results at lower signal to noise ratios than classical techniques based on linear filtering this explains in part the recent interest in svd techniques for signal processing this book is a compilation of papers that examine in detail the singular decomposition of a matrix and its application to problems in signal processing algorithms and implementation architectures for computing the svd are discussed and analysis techniques for predicting and understanding the performance of svd based algorithms are given the volume will provide both a stimulus for future research in this field as well as useful reference material for many years to come

a collection of 50 of dr mark e josephson s groundbreaking journal articles that demonstrate his important contributions as a pioneer and teacher of modern cardiac arrhythmology over the course of 42 years each article not only includes a discussion by a peer of the significance of the defining paper but also includes personal impressions of dr josephson as a clinical scientist doctor teacher role model and friend

statistical performance modeling and optimization reviews various statistical methodologies that have been recently developed to model analyze and optimize performance variations at both transistor level and system level in integrated circuit ic design the following topics are discussed in detail sources of process variations variation characterization and modeling monte carlo analysis response surface modeling statistical timing and leakage analysis probability distribution extraction parametric yield estimation and robust ic optimization these techniques provide the necessary cad infrastructure that facilitates the bold move from deterministic corner based ic design toward statistical and probabilistic design statistical performance modeling and optimization reviews and compares different statistical ic analysis and optimization techniques and analyzes their trade offs for practical industrial applications it serves as a valuable reference for researchers students and cad practitioners

the main function of the sensory systems is the transducing of external stimuli into bioelectrical signals which are conducted through afferent pathways from sensory epithelia to the brain however it is known that descending projections are ubiquitous in the different sensory modalities and in the case of auditory efferents connect the cerebral cortex with sensory receptor cells several functions have been attributed to the efferent system including protection to acoustic trauma

unmasking of auditory stimuli in background noise balance of interaural sensitivity and some cognitive functions like modulation of cochlear sensitivity during selective attention to auditory or visual stimuli in addition there is evidence of a possible involvement of the efferent system in the etiology or treatment of some clinical pathologies like tinnitus in this e book entitled auditory efferent system new insights from cortex to cochlea we aimed to give an overview of the advances concerning the descending projections from the auditory cortex to subcortical nuclei and the olivocochlear system in addition different theoretical proposals of efferent functions are presented we think that this e book is an important contribution to the understanding of the efferent system in mammals merging auditory cortex literature with studies performed in the olivocochlear system
